

NEW PRODUCT

Professional Dial Gauge

This new Dial Gauge is ideal for the automotive professional. It's easy to use, highly accurate, and designed for heavy duty use. The large dial face is easy to read and provides readings in PSI and kPa. The metal body is ideal for rugged environments and the rubber boot protects the gauge from damage.

FEATURES AND BENEFITS

- Large, easy-to-read 270° dial face ensures a precise pressure reading.
- Provides measurements in 1 PSI increments from 0 - 60 PSI, and 10 kPa increments from 0 - 400 kPa.
- Ideal when a highly accurate setting is required.
- A dual-purpose bleeder button, which will aid in setting the tire pressure to a specific reading, is included.
- Bourdon-tube type dial gauge.
- 12" hose with a swivel chuck.
- Rubber boot helps protect the gauge.

APPLICATIONS

- For use on automobiles, motorcycles, bicycles, light trucks or any application requiring inflation.
